7 Days & 24 Hours

Each day corresponds to a traveller energy
Each hour corresponds to a traveller energy
(see tables below)

Winter Solstice is the Day of Stillness and stands on its own

52 Weeks

Week 1 starts the day after Yule
Days of odd weeks are marked in **Red**
Days of even weeks are marked in **Blue**

13 Months

Each month is 4 weeks of 7 days starting the day after Yule
 $28d \times 13m = 364d + Yule = 365d$

On Leap Years, Midsummer also becomes a Day of Stillness*

$28d \times 13m = 364d + Midsummer + Yule = 366d$

This then shifts the start of Week 27 one day ahead

**Leap Year = year divisible by 4*

However, if the year is divisible by 100, then it must also be divisible by 400

Lunar (Synodic) Month

*Starts at each New Moon
29 or 30 days duration*
